Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2-27-2008 has been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 55-62, 64-65 and 67-69 are rejected under 35 U.S.C. 102(b) as being anticipated by Sandmore USPN 6,059,760.

Applicant's recitation of the distal tip shown in figure 13, which is believed to be what is attempted to be claimed. Viewing figure 16 of Sandmore, the examiner gives the broadest reasonable interpretation to proximal, which can mean proximate. In this regard the examiner considers the proximal point to be a point proximate, or otherwise thereon the central axis, generally inside the lumen at point 32. A curved surface extends from that point to the outflow apertures. About half way around the curve is a

Art Unit: 3766

point that forms an apex of the curve which is distal (away from) the proximal point. Most of the blood is directed outward and substantially avoids going out the distal top. The rounded tip is hemispheric, and a generally parabolic curve can be seen between the central axis to the opening with the apex in the middle. The device has additional apertures that are capable of performing the function of claim 68 depending on how it is used.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 63 and 66 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sandmore USPN 6,059,760. To have used square holes or a radiopaque marker would have been obvious modifications well known to the art and would not alter the function of the device. The radiopaque marker would allow positioning of the device in the body as desired as well notoriously well known.
